

### Sample Weight and Confirmation

For the final step you are going to need to get out your weight scale. For us to book our courier to collect the samples from you we need to know the exact combined weight of all your samples. Once you have confirmed and placed your order we will send you packaging, tracking barcodes, packing list and other documents needed by our courier to accompany your samples. Click here for more [specific information](#).

1. What is the total weight (kg) of all samples?

 kg

2. Are your samples flat packed?

☐ Yes, I Confirm

All your samples need to be flat-packed and folded flat, no garment hangers or hanging garment bags are allowed due to courier carton space and volume constraints.

3. Are your samples labelled with a Name or SKU?

☐ Yes, I Confirm

Your samples also need to be individually labelled with the Style Name / SKU that then matches up with the linesheet that you uploaded on the previous step. We need this information so we know which sample is which - The label can either be on the garment with a swingticket or on the garment bag.
